Dear Friends and Supporters,

Passover, the Festival of Freedom, carries special meaning as Israel continues to face immense challenges. While most hostages have returned home, we continue to pray for those still held captive.

Even in times of hardship, we persevere. In December 2024, Hadassah Medical Organization made history by earning the highest honors in international accreditation from the Joint Commission International (JCI) across all our facilities. This recognition reaffirms our excellence in medical care, research, and physician training.

We are growing and strengthening Israel's future. This year, we will open the Hadassah-Helmsley Medical Center in the city of Netivot, bringing essential medical services to the country's South. Additionally, the recent extension of Jerusalem's light rail to the main entrance of Hadassah Ein Kerem enhances accessibility for all.

Despite ongoing challenges, at Hadassah we stand united in our commitment to healing, dignity, and peace.

Thank you for your unwavering support.

Chag sameach,

Dalia Itzik
